

Peer-Review 2: Communication Protocol

Cristiana Calvaresi, Valerio Capo, Giovanni Mattia Codemo
Gruppo AM12

6 maggio 2022

Evaluation of the communication protocol of group AM42.

1 Positives

The protocol seems robust and capable of transmitting all the needed information between client and server.

2 Negatives

It wasn't clarified if the pings are used throughout the entire lifetime of the server, though we believe it to be implied.

3 Comparison

Our communication protocols are very similar, the only difference being the format of the messages exchanged simply due to a difference in general implementation.
